

## LOGIX APPLICATION HOSTING SERVICES

Reliable Global Hosting Service for Business and Electronic Commerce

Keeping up with the fast-changing technology behind many of today's business applications and e-business solutions is one of the biggest challenges small and medium-sized enterprises (SMEs) face. SMEs are increasingly turning to Application Service Providers (ASPs) to provide affordable solutions.

LOGIX Online hosts applications on their servers, renting businesses access to software and data storage space. SMEs benefit by receiving secure, dependable access to the latest technology — for a fraction of what it would cost to purchase hardware and software, implement network infrastructure, and maintain and upgrade these complex systems themselves.

LOGIX's Online ASP service delivers exactly the solutions your business needs, whether it has 10 or 10,000 employees. We offer:

- Hosted access to industry-leading enterprise solutions which include:
  - ACCPAC®
  - BusinessVision®
  - Microsoft® Office XP®
- Hosted access to e-business solutions
- VPN, Networking Hosting and Internet Access Services
- Reduced upfront and long-term costs
- Fast, secure, dependable connectivity
- Reliable service 24 hours a day, 7 days a week (24/7)

You can benefit from LOGIX's Online ASP service whether you're a traditional business, an e-business, or a combination of the two. We host industry-leading accounting and e-business applications or we can co-locate your equipment in our World Class E-business Data Centre; we also provide access to leading accounting and e-business applications. Your business benefits by receiving secure, dependable access to the latest technology — for a fraction of what it would cost to purchase hardware and software, implement network infrastructure, and maintain and upgrade these complex systems yourself. It's fast, it's easy, and it's affordable.

The LOGIX Online ASP service also offers your company unique scalability; our applications may be distributed regardless of location to any device running a Web browser with ActiveX, plug-in, or Java capabilities. Your employees will feel comfortable using the familiar Web interface; when your company grows, you can simply add more applications and connect more users. LOGIX Online makes it easy for you to utilize powerful advanced business applications anywhere today, and add advanced capabilities as you need them tomorrow.

### Save Time and Money

The idea that you need to spend hundreds of thousands of dollars for cutting-edge technology is a thing of the past. By renting your enterprise and/or e-business applications through LOGIX's Online ASP service, you eliminate the upfront costs associated with purchasing, installing, and configuring specialized hardware and software. You also eliminate the long-term costs associated with staffing, maintaining, and upgrading your systems every time new technology is introduced.

Renting your applications through LOGIX Online gives your company a low-cost strategic advantage that's tough to beat, and that allows you to concentrate on your business — and let LOGIX worry about your computer system problems.

### How does LOGIX Application Hosting Service Benefit Your business?

- **Guaranteed server availability.** Your application is always ready to use.
- **Secure content publishing.** LOGIX will provide you with the security required so that you control who can access your application.
- **High-speed access to your site.** LOGIX servers are directly and redundantly connected to the Internet network via 100 Mbps Ethernet connections to your application.
- **Security.** LOGIX premises are equipped with break-in, fire/smoke, and video surveillance security measures.
- **World Class Network Operations and Support.** We monitor our network and Web service 24 hours a day, seven days a week.
- **Service Level Guarantee.** We offer you service agreements that guarantee the availability and performance of the online applications.
