

Logix dial-up access for Canada

An All-Purpose Solution for Individuals and Companies.

LOGIX's Dial Access services are excellent "quick-start" options for personal to home office and people on the move that are beginning to use computer networking and the Internet. These Dial-up services, cost-effectively provide every user with a package that best suits their needs while providing easy to use "on-demand" access to the Internet at speeds up to 56 Kbps, right from almost anywhere in North America.

Using a basic analog (normal) telephone connection, Dial Access services provide our subscribers with the benefits of Internet access without the physical boundaries of cable modems and cost of dedicated circuits or the possibility of sharing personal information with your neighbourhood. Connect at speeds up to 56 Kbps from almost anywhere in North America.

Dial Access services let you access the internet from where ever you may be, it doesn't tie you down to your home, and allows you to access internet services like email even while you are on the road, visiting or at the cottage. Even better, you can choose the inexpensive monthly package that fits your budget.

More about Dial Access Services and LOGIX

Service Options

Each Dial Access account includes an internet connection package, one internet e-mail account and numerous local access numbers across Canada. If you are traveling in remote areas or in the USA a 1-800 number is provided at a very reasonable (up to 80% less than most hotels charge for long distance) rate, billed extra to your account as part of the service. Subscribers that travel frequently to the USA please ask us about our USA Dial Access Service.

Fast Delivery

Once we've received your completed Dial Access service order form, we'll have your Internet connection up and running within hours. (Your telephone service is billed separately by your local telephone company.)

One-Stop Shopping For Your Internet Address, Domain Name

We will provide you with an email address using one of our available domains or we can register your business' unique Internet domain name, getting you connected quickly and efficiently while allowing you to focus on your business.

How do LOGIX Dial Access services benefit you?

- Dial Access services give you or your company fast entry to the Internet. Dial services allow you to establish yourself on the Internet without committing to a full-time, leased-line service.
- Dial Access services offer the reliable Internet service your business requires and your customers expect. Dial Access services can give you quality access to the Internet.
- Cost-effective, package-rate pricing makes Dial Access services easy to budget and afford. If you stay within your package your cost is fixed and billed to you on a single invoice.
- Flexible package-rate plans mean if you underestimate your monthly usage and exceed your package hours, you have the option of either paying for your additional hours or upgrading your plan to the next higher package.
- Built-in security for your computer. Your connection to the Internet is open only when in use. At other times, your network remains sealed off from unauthorized access.
- Add LOGIX Fax service for convenient desktop faxing via the Internet and save on fax charges.

Mailboxes

LOGIX will provide individual mailboxes. If you have your own domain ask us about our domain-name e-mail service (user@yourdomain.com). LOGIX-Mail allows subscribers to access their individual mailboxes using any POP3 e-mail client software from anywhere on the Internet. You can have up to 5 additional e-mail addresses (aliases) for your mailbox for FREE! Additional mailboxes are available for an additional monthly fee. World Class Network Operations and Support. LOGIX 'S Network Operations Centre monitors our network 24 hours a day, seven days a week. Our Customer Support Group provides telephone and e-mail consultation during business hours to help solve problems or improve network performance.

1. Please check any number you select from this listing with your telephone company to ensure it is a local call, as applicable long distance charges will be the sole responsibility of the customer.

2. An additional per minute charge of 20¢ will be billed to your account for the use of this number. If you travel frequently to the U.S. you should contact us about a U.S. account.

Dial services are an easy and economical way to get connected to the Internet. Just dial the access number for the LOGIX Point-of-Presence (POP) and your PC establishes the Internet connection. If the subscriber is done but forgets to disconnect, the connection is ended automatically by our Network Operations Centre. This helps keep your hours from being wasted and limits (if toll charges apply) telephone charges.

Service Features:

- Provides complete access to Internet services, including e-mail, newsgroups, file transfer, and the World Wide Web
- LOGIX assigns dynamic IP addresses and supplies you with your own personal email address
- Provides telephone and e-mail access to customer support
